

# nDura

## Architectural Concrete Systems

nDura Flex is a highly decorative, pigmented, 100% solids, two component topping system. Mixed with a wide selection of decorative aggregates and trowel applied to a 3/8-inch nominal thickness.

nDura Flex provides outstanding durability and wear resistance resulting in a long life cycle of any flooring system available. Our Flex system is highly crack and stain resistant. This can be achieved when installed in conjunction with a Waterproofing and Crack Isolation Membrane.

### KEY ADVANTAGES

- Extensive color selection allows for unlimited design variations
- Colors will not fade or wear thin
- Chemical and stain resistant
- High wear, impact and abrasion resistance
- Rapid cure and finishing time
- Less weight than marble, granite and cement terrazzo, more suitable for multi-story buildings
- Low odor during application and cure, can be applied in occupied buildings
- Low maintenance, sanitary
- Resists bacteria and fungal growth
- Lowest life cycle cost decorative flooring available
- Low odor for use in occupied areas
- Meets USGBC LEED criteria for low VOC
